

Couples/Family Interaction Cycle & Safety Screen (Original)

Empty questionnaire

Last 4 weeks. Items 1,3,8,9,10,11,12 higher = more problems. Items 2,4,5,6,7 higher = more strengths.

Items:

1. We get stuck in the same argument cycle
2. We can repair after conflict
3. One of us pursues while the other withdraws
4. We feel emotionally safe with each other
5. Communication is respectful even when stressed
6. Parenting/roles feel balanced (if applicable)
7. We have aligned expectations about responsibilities
8. Jealousy/trust concerns are frequent
9. There is criticism/contempt during conflict
10. There is stonewalling/shutdown during conflict
11. There has been physical intimidation or fear (0=no,4=yes)
12. Substance use affects the relationship

Training/demo only; not diagnostic. Risk endorsements require clinician escalation.
