

Psychodynamic Relational Patterns & Defenses Screen (Original)

Empty questionnaire

Last 1–3 months. Higher scores on items 1–8 indicate more difficulty; items 9–11 indicate capacity; item 12 indicates transference awareness.

Items:

1. I notice repeated patterns in my relationships
2. I fear abandonment or rejection
3. I struggle to express anger directly
4. I feel shame or self-criticism after conflicts
5. I pull away emotionally when closeness increases
6. I feel intense need for approval
7. I often intellectualize instead of feeling emotions
8. I avoid difficult feelings through distraction/overwork
9. I can identify what I feel in the moment
10. I can tolerate mixed feelings without acting impulsively
11. I notice how past experiences shape current reactions
12. In therapy, I react to the therapist as if they were someone else in my life

Training/demo only; not diagnostic. Risk endorsements require clinician escalation.
